expand

HOW TO  
Please give details of your reasons for support/opposition, or make other comments here:

Ashington village has had many additional new houses built over recent years, which has already increased parking + traffic through the village, also making the main London Road a noisy + busy road - the pathetic speed bumps are useless + do nothing to slow people down. More vehicles will be using the village's roads, increasing air pollution, noise + all hazards associated with traffic, London Road particularly will notice as it is the only access to + from the A24. The village school will require expansion to accommodate children from the proposed new houses. + Ashington will lose its village 'feel' + character of a West Sussex village.  
Lack of facilities - only one shop. Lack of utilities - especially when we're all getting notices from South Water about the reservoir resources being very low -

What improvements or modifications would you suggest?

How will extra 250 houses affect that?  
Wildlife/country walks destroyed. Dust, noise + inconvenience whilst being built.
