<div>Project Title/Drawing Title</div> <div>HORSHAM DISTRICT COUNCIL SFRA</div> <div>FIGURE 11- HISTORIC INCIDENTS OF SEWER FLOODING BY POSTCODE</div>	<div>Notes</div> <div>Southern Water has provided an extract from their DG5 Register for Horsham District. Due to data protection requirements, the data has been provided for the number of properties within a 4 or 5 digit postcode area that have experienced flooding either internally or externally within the last 10 years. It should be noted that records only appear on the DG5 Register where they have been reported to Southern Water, and as such they may not include all instances of sewer flooding. Furthermore, given that Southern Water target these areas for maintenance and improvements, areas that have experienced flooding in the past may no longer be at greatest risk of flooding in the future. This map is intended to provide a strategic overview of areas at risk of sewer flooding and should not be used to assess flood risk for individual properties.</div>	Client			AECOM
